Project Details

Project1 : FreightOptimizer Brokerage (Jul, 2021 - Present)

Domain   : Logistics

Technologies   : VisualStudio 2017, SQL SERVER 2016, C#.NET, Web Services,ASP.NET 4.6, MVC, Knockout JS, ElasticSearch, Microservices, JavaScript, JQuery, Web API Services, WCF, Messaging Queues (RabbitMQ), Entity Framework using Repository Pattern, CQRS patterns in Micro services, ELK stack.

Team Size   : 30+

Description   : FreightOptimizer Brokerage is for managing orders for customers and carriers in the logistics business. The freight brokerage process starts with an order tender, then fright scheduling, which involves carrier matching, load assignment, and rate confirmation. Following load execution, which includes dispatch, pick-up, tracking, and delivery, and finally billing at external systems like SAP and Sharp4.

Project2 : IT Asset Management (Jun, 2020 - Jul, 2021)

Domain   : Internal Applications

Technologies   : ASP.Net(C#) MVC, WCF, Web API Services, JavaScript,JQuery, HTML, CSS, SQL Server 2017

Team Size   : 30+

Description   : IT asset management (ITAM) is the set of business practices that join financial, contractual, and inventory functions to support life cycle management and strategic decision-making in the IT environment. Assets include all elements of software and hardware that are found in the business environment.

Project3 : Physical Security Solution (Apr, 2019 - Jun, 2020)

Domain   : Internal Applications

Technologies   : ASP.Net(C#) MVC, Web API Services, JavaScript,JQuery, HTML, CSS, SQL Server 2017

Team Size   : 10+

Description   : Physical Security Solutions provides management of employee access cards and inventory management. Operations include managing access card requests, printing access cards, individual and bulk orders of inventory items, and their lifecycle management.

Project4 :PIS-Pharmacy Information System (Feb, 2018 - Apr, 2019)

Domain   **:** Pharmaceutical Industry

Technologies   : C#.Net Windows Application, SQL Server 2014

Team Size   : 5+

Description   : The PIS System deals with the maintenance of drugs and consumables in multiple pharmacy units, making communication possible between each pharmacy unit and a central pharmacy store. PIS is designed to manage all aspects of operations, such as purchases, sales, inventory, and reports.

Project5 : Web-based Call center Delivery POS Solution (Apr, 2017 - Feb, 2018)

Domain   **:** Online food chain

Technologies   : AngularJS , ASP.Net(C#) MVC, SQL Server 2014

Team Size   : 5+

Description   : The Web-based Call Center Delivery POS solution is an order processing system that allows all aspects of restaurant delivery to be managed at a central location. Centralized call center management of order taking, order processing, and handling of customer inquiries and complaints are managed at a single location.
